

ACTIVITY IN CURB ISSUES INCREASES

Several Industrials Touch New High Records Because of Pool Operations.

Increased activity showed in Curb trading yesterday, and stocks enjoyed substantial advances. Early short covering advanced prices from a traction to five points, but as the demand for stocks lessened in the afternoon, prices reacted slightly from the high levels.

Keynote Tire and Rubber made a new high on short covering following news that the company had closed a contract with the Fire Rubber Company of Springfield, Mass., to handle all of its spring production, which it is estimated should increase the total business of the Keystone at least \$2,000,000.

Parlanka Scale was well bought and reacted to a new high with a gain of more than a point. There was increased activity and strength in a few oils, but the general tone was irregular. Royal Dutch, overvalued, over the rest of the group, ended the day with about 4 points gain and sold to within a point of its all-time high.

Food Oil was again in good demand, and it was certain that results from drilling in the Goose Creek field are expected soon. General Asphalt moved erratically, but showed a gain of about a point at the close. The tobacco stocks were strong, and British-American new selling record its highest level. It was stated that the company's plants did a larger business in the first three months of the current fiscal year, October to December, than in any other period of the preceding year, when all records were broken.

Interest in the mining group was again directed to the gold issues, which advanced in Golden Gate Exploration. Bonds were less active, but firm. Russian Government bonds showed light trading. Total sales and range of prices follow:

PRICES SOFTENING, SAYS J. STRAUS

Tailor Sees No Drop in Clothing for Men

Speaking at yesterday's session of the convention of the National Retail Dry Goods Association at the Hotel Pennsylvania, J. M. Straus, president of the National Merchant Tailors Association, says that in both England and America the stocks of civilian goods are exceedingly small.

He said that the consumer of men's clothing will have to pay as much, if not more, this year than in 1915 for woolen goods, and that there is not sufficient wool supply or machinery in sight to be available for the rehabilitation of mauling, woolen authorities and believe that the consumer of men's clothing will have to pay as much, if not more, this year than in 1915 for woolen goods.
